

Vibration of FIVE

Your predominant attention determines your Intention and in turn also determines what you attract to you. This is abundantly clear as I began experimenting with word play inspired by Randy Master's observation to look into the relationships that are built upon our language. "Angels and Angles" "Stones and Tones" A majority of this paper will be an offering of blended information and guidance from source. This is only the truth as I see it, within the confines of the reality that I have chosen to create, manifest, interpret, and share. With respect to the foundation and seed sounds based in other languages I will be primarily using examples within the English language because of the inherent freedom it affords. By design the English language offers a platform of Unity and Evolution.

(excerpt from The Day of Wisdom According to Number Vibration By L. Dow Balliett (pg 40)

"Every atom in your body and every thing in the universe vibrating "5" can be made to vibrate in harmony with you (and vice versa). Remember that the(being) that you are studying upon is vibrating in one of (Source's) planes and try to realize which plane it is, as a horse, a flower, or gem, and when the missing link of (Source) is grasped, the(being) you have been studying may disclose a knowledge which will astonish you..... Study hotels, stores and wearing apparel which vibrate to the same number not with a narrow view but with a broad outlook and try all the things related to you. You will recognize this force according to your grade of consciousness." (1)

When I decided that 5 was a key to focus upon for this paper It just flowed and was so much FUN! So it begins with: (has five letters and is the source of our energetic field /Torus)

heart

now move the "h" to the end

earth

Both words contain "ear" Our ears are one of the first organs to develop in the womb and as a fetus we also resemble the shape of the ear. So lets look at the letter "E"

"The letter E is pure, unadulterated energy and is the only letter of its kind. Think of Einstein and his theory of relativity: $E=Mc^2$, then take that thought further until you reach the atomic bomb. The structure of the E stretches into the future and yearns for advancement: the top arm is the brain or mouth or both, the middle arm is, quite literally, the arm and heart and soul and the lower arm is actually a leg and represents moving forward."

The E's numerical ruler is the 5, which is governed by the desire and need for freedom, change, independence, challenge, communication and sensory satisfaction. E also happens to be the Fifth letter of the alphabet.

E

Noun 1. Ether – the fifth and highest element after air and earth and fire and water; was believed to be the substance composing all heavenly bodies (Webster’s Dictionary)

Using the structure of the letter E we can begin to see the bridge from earth, to the heart, and the heart to ether. (refer to RFA handout Session #2 Pg20)

As Above

V

So below

The number 5 can also be represented by the letter V. For me it reinforces the infinite potential of our journey. It all depends on where you are within the envelope of the structure. According to Nassim Hamein (Physicist and Nobel peace prize recipient) Scientists often only comprehend this principle from the so below part. We focus on the infinitely smaller and smaller thinking each time we have found the “god particle” only to discover that there is a tiny world in existence that is even smaller with the next innovation. We need ego smashing instead of atom smashing. But we cannot look back only forward and inward.

It is entirely related to sacred geometry and our bodies also at the time of conception represent this truth.

<http://transmissionsmedia.com/flower-of-life-and-cell-division-geometry-of-creation/>

“Cellular Memory Memorization and (vibration) are all parts of our physical body of consciousness, They are stored at the cellular level, in all the cells of your body. The body is the intelligence and the intellect. The body never forgets. It has recorded all your information and experiences in your Time Continuum. The body remembers. The body is your information source and resource for change, healing and becoming healthy emotionally and spiritually. The Brain only knows how to re-create different versions and variations of the same old limited consciousness. You cannot release your

traumas, your dramas or heal yourself from your brain. Your brain cannot heal your body. Your body does the healing. Your body knows what to do.” (2)

The words we choose, the thought forms we manifest affect all beings. We can be poetic, change need to require, want to desire.

One of the hopes I had to place on this paper was to liberate the brain from the harness of knowledge “what was/is known” and allow the openness of looking at things in a new way. Try to see the connections because they are everywhere. It’s not insane.
