

*To summarize what you are reading here is information and channeling with the Hathors that I was given. Much of what you read is some of the information they want the class to know.*

*This is your message David and advice from the Hathors. We the Hathors recommend to do more rituals of cleansing with the burning of bay leaves for your home, office and all spaces. Mud is the physical cleansing tool for your body. It should be applied to the Face and put different signs on the forehead such as swirls, dots, pyramids, lines on the third eye area. We would like you to us mud from your property that has not been touched because it carries a clean energy that has not been in contact with other energies. We would like for you to try mud and dandelion leaves on the pain areas then cover it to create warmth and left on for two hours. We are so happy with all the work you are doing. And we fill you with love. Belen Arzate*

### *Bringing in messages from the Hathors*

*In the beginning of doing this work I had never worked with these being called the Hathors but once they came into contact with me I knew who they were. A colleague of mine channels the Hathors and through him I meet them. When I started the course during the first week in my meditation the Hathors came in. In the meditations they continuously began to appear before me with massive amounts of love, peace, kindness, and gratitude for all. They are a collective made up of a divine feminine order. They are a high vibrational interdimensional intergalactic light beings. They come in through the planet Sirius that is located next to the planet Venus. They want those in the class to know of their presence and want to share that they are here for your highest divine purpose in love and light. They also come in with the respect to all other presence and beliefs that you hold. We prefer to communicate in sounds that are in higher tones. We come to you with the*

*offering that you use the E tone in multiple ways which will allow you to open and live in your heart center. And while being in your heart center you achieve oneness with self and start living towards your highest vibrational state and take the steps to walk through your mission which allows you to experience sources love and light at all times. That will allow you to coexist in harmony and peace with all being on your planet. We wish for your highest growth at this time as we grow and ascend with you. We offer these other tones aaa, maa, le for you to chant during a meditative state to call us in and feel our presence which is a form of communication. We also like to invite you to be more in nature. Going out into nature and being with the trees is where you will find our presence and be one with us. We also want to remind those that forget that you can use flowers and dirt and any earth element for healing properties. We want you to know who we are because you are not alone and we wish for your well being at all times. Thank you*
