The Inner Tree of Life as a Resonant Visual Inner Temple for Sound Healing

Abstract: The Tree of Life has a rich lineage as a symbolic depiction of both Earthly and Cosmic wholeness. Through my research and a partially channeled personal Akashic records session, I will describe my relationship spiritually, ancestrally, geometrically, and functionally as a tool for my sound healing clients and as a deeply effective way of orienting our bodies to bridge Earth and Sky, the physical and metaphysical realities, for healing, balancing, and maintaining Sacred Space in sound healing.

The form of the Tree of Life that struck me as a revelation during my first trip to southwest England, where in a day I had learned how to drive on the British side of the road, navigate dozens of roundabouts, and leave London traffic for the West Country. After visiting Stonehenge, I took my friend Justin and myself to Glastonbury, where beautiful metaphysical shops lined this ancient site of power and pilgrimage. I noticed a beautiful image of a tree whose branches and roots meet at the outer edge of a circle:

And while I may have remembered it as old Celtic pattern popular in jewelry design, it deeply struck me as a symbolic pattern of wholeness, movement, and especially of the Earth realm as a sphere, a dynamic, seasonal being, and of the recycling of energy. This was in August 2013, and this image has remained with me ever since, as a powerful reminder. But what of, exactly?

Historically, the Tree of Life comes from such ancient spiritual traditions as the World Tree of Northern Europe, the Near East, and pretty much all over the world.¹ It has creational mythology associated with it, as well as tales of movement between dimensions and Earth-Sky connections.²

I'd then began to put together some other forms that are shaped like the Tree of Life. The one that's most notable for me is the Torus field! The Tree of Life, like the Infinity symbol, and the torus, indicates dynamic movement from a central point and pillar to the outer edges of its "field". So while it is fairly popular to use the toric field in visualization for meditation and healing, I have found a process by which I feel very present in Earth and Sky by specifically invoking the torus as a root-and-branches form when I create sacred space for sound healing with my clients. I even use it as a way of balancing intuitive information when I work with the Tarot for clients.

I use this imagery to create a structure that will function just like a tree does: to take knowledge-nutrition from Earth Mother through a root system while the branching-leafing system expands above to contact and receive Sky wisdom. When I go through this visualization with clients, I allow this tree to grow from the Heart Center, and I also allow them to choose the color and kind of light-energy they wish to create with their tree based on their own intuitive and spiritual makeup. The Inner Tree of Life is the gateway between the protective Quantum sphere's inner and outer boundaries. It is a system known to both the body and spirit, invoking the Tree Beings' wisdom as an Earth Family and a Cosmic Web as many indigenous cultures

describe the Web of Creation. I also find that the Inner Tree of Life imagery helps to ground me to Earth Mother's wisdom and records while I can trust in the presence of the "Cosmic Committee" of Oversoul and Soul Family, Guides, Guardians, and other non-physical relatives and assistants from the tree's branches and leaves, which are symbolic of our many connections throughout the Universe and its myriad dimensions.

Interlude

What is the difference between an Inner and Outer Temple?

The one that you can sense immediately

The one that reminds you of where we came from

The one that integrates with the Soul

Some create resonant temples Earth inspired

From within the Kiva, the Womb, the Vessel

Some create upon her, integrating elements:

Stone, Wind, Water, Fire

A circle of Trees or Electric Rock

We remember these as gifts from Original Teachers

Sky Family Teachings and Ways

And since the Opening of the Christos

In the Piscean cycle and Iron Yuga

We have gone Inward, Underground

And thus the Hermit's Temple

The Alchemist's Lab

The High Priestess's Vessel

Has become

The Compassionate

Courageous

Heart.

Akashic Perspective on Healing Capabilities

I recently gathered with the Teachers, Guides, and Great Family in my Akash and asked a few questions, because of the my unique tripartite way of creating Sacred Space: the Quantum Sphere for invoking Source Energy and as Source Truth "filter; the Inner Tree of Life as an electro-magnetic toric form based on Gaian tree forms to invoke the Earth and Sky Families;

and, finally, the Healing Octahedron that has been deeply present in my inner world and was inter-dimensionally transmitted to me in the Summer Solstice of 2010.

When I asked, “What are the Healing Templates I have to use in this lifetime?”, they answered briefly about my lineage, and mentioned that both my grandmothers’ lineages is where the healing traditions come from. After confirming my tendency to gravitate towards the “Feminine Mysteries” (which I associate with the circular, intuitive, and collaborative-egalitarian nature of my healing impulses), they mentioned “the Sacred Rite of Octahedron is a Balance lineage from the Mediterranean ancestry-lineage.” Afterwards, they responded specifically to the Tree of Life:

The Tree of Life is deeply global & cosmic; and it helps others relate to their Gaian & Cosmic connections. Thus you have the Holy Trinity: the Quantum Sphere is the Source layer of Truth; the Tree of Life is the Gateway to us and other assistance for yourself and your clients’ Earth Records and “Heavenly Voices/Perspectives”; the Octahedron is the creation of the Healing “Space”: a Space of Perspective in Sonic Unfolding, a Vessel of Equalizing Wholeness, delineating from the horizontal plane the Four Elements and a strong pillar balancing Earth & Sky.

My final question, while not directly related to this paper, but which I sense will be of benefit for the larger class and community, concerns the path of my way of using sound healing. They replied: “You are a Sacred Syncretist. This is why you travel—your energy weaves a golden thread around Earth. Having various experiences is your way of authentically connecting to others. You have ability to hold “Neutrality” while offering the interactive facilitating power in healing practice.”

As a Sacred Syncretist, Sound Healing has become a path that challenges me to use my practices and intuition on myself. It requires a deep honesty about respecting the backgrounds and ancestry of my clients in a time where we must face and learn to dynamically address and, when possible, intend to mend and heal the soul and the karma of human sacrifice through wars

of empires, wars of racism, wars of ideology and conflicting sky family origins and perspectives. I am deeply humbled and passionate about the work my soul records and soul wisdom brings to an ever-growing population of sound healers. My prayer is that I may bring the fullness of my training, my soul light, and the grace and bounty of my earth and sky lineages to bear on the path I choose in this chapter of Earth's transformation, using the unique synthesis of tools within and the wise counsel of those who've gone before me to assist in the healing and awakening of the sibling of the Family of Earth.
