Archangel Metratron described Alchemy as **“the changing the frequency of thought, altering the harmonics of matter and applying the elements of Love to create a desired result that is Love.”** (Jim Self)

ALCHEMY IS

- It is a way of living your life with awareness and intention, having a conscious relationship with Creator.
- Alchemy is transforming the density of your physicality into the Living Light Body.
- It is stepping out of unconsciousness to higher states of being

It is the path to the 5th dimension and beyond. (my path)

- Alchemy is the ability to create the apple in your hand.

(From Jim Self)

IT IS THE JOURNEY HOME

Introduction

I have been a student of the 'Mastering Alchemy' course for the past five years with Jim Self and Roxanne Burnett. The information learned from their classes integrates well with Sound Healing. With permission, I wish to share some basic knowledge that I have learned.

Our thoughts are electrical and our emotions are magnetic - and when together they become electromagnetically charged and don't go anywhere. Think of when you may constantly have the same thought over and over again and you just can't seem to get rid of it. When we continue with our unconsciousness negative thoughts, we create density and once dense enough, our thoughts and emotions materialize into dis-ease. Stuck emotions are what cause dis-ease in our body. Add the Law of Attraction to this and watch out. By saying, 'I am feeling so sick', well, the Universe will give you more of feeling sick. Or, 'Kick me, I want more' - well again watch out!

The information I am sharing today is from my last five years as a student of Mastering Alchemy.

LOVE WHAT IS LOVE?

LOVE IS THE EXPRESSION AND POWER WITHIN EACH OF US THAT CREATES.

- Love is the power that moves the wind and pushes the ocean waves.
- Love is what holds the planets in their orbits.

Love is nature, it is the sound of the birds singing the laughter of a child.

Love is the vessel of all possibilities

- Love can manifest as a frequency, pitch, musical interval, chord, timbre (tonality or sound), rhythm, music, or energy.
- The energy of love is actually a frequency higher than sound.
- 528 Hertz is considered the frequency of Love.
- Many consider the F note as the note of the heart chakra.
- The most common musical interval used to express love is the musical 3rd and the minor 6th.
- Love is the radiance of pink Light that glows from the Sanctuary of the Pink Diamond within the Sacred Heart.
- It is the fifth Element of Love that is the essence of the **Christed Matrix**.

**LOVE IS A WAY OF LIVING YOUR LIFE WITH AWARENESS AND INTENTION –
HAVING A CONSCIOUS RELATIONSHIP WITH CREATOR.**

I wish to share the story of the Fall of Consciousness as told to Jim Self by Arhangels Uriel, Zadkiel, Mihclael and Metratron.

BE STILL

Gently close your eyes and relax.

Take 3 deep breaths. Breathe in through your nose and out through your nose.

BE QUIET, BE PRESENT, BE AWARE OF EVERY THOUGHT, EVERY EMOTION, EVERY ACTION.

The camera is always on. Your guides are always there to assist and are waiting for you to call on them

I invoke Sacred space. I call on the Lords of Light, the Ascended Masters, the Collective - Archangels Metatron, Michael, Uriel and Zadkiel, Lord Mechizedek, Yeshua, Mother Mary, Mary Magdalene, Anna (the grandmother of Jesus), and the masters of Sound and Light Vibration. I ask for their assistance and guidance.

I call upon Mother Earth and Father Sky. I call upon the four sacred directions.

From the East, I call upon the presence of Eagle for great abundance.

From the South, I call upon the presence of the coyote for faith, trust and humility.

From the West, I call upon the presence of Great Mother Bear to help us shed our old skin – in transformation.

From the North, I call upon the presence of Buffalo for grounding, solidness and strength – to give back and share wisdom with others.

As above so below

Close your eyes

Be quiet and listen to the story.

Go within the sanctuary of the pink diamond within the Sacred heart and connect with Creator. See the crystallized aspect of Light that sits in your Sacred Heart within the star tetrahedron. See within the pink diamond radiating love. It is translucent, iridescent, fluorescent. See the three-fold flame through which the first three Rays of Creation are anchored. Feel the essence of Creator. - Feel the presence of the Teachers of Light.

Be in reverence

Listen to the story of the Fall of Consciousness (from Mastering Alchemy)

Hear the beat of the Eagle drum.

Visualize your planet that you temporarily live on. Your Earth is not a being. It is a consciousness and an organism. It simply absorbs and reflects back what is in the environment of the organism to Creator.

As creation is expanding visualize the twelve living centres of consciousness being drawn from the Christed aspect of Creator. Each center holds the Love and light of Creator reflecting back Love and Light to Creator. You are on Earth, one of the special centres of Light. Your Earth is one of the 12 Christed planets that fell.

Creator sent creator gods out to explore and create new possibilities. Creator wished to know itself more.

RAYS OF CREATION ARE APPLICATIONS IN THE CREATION PROCESS

So, the **First Ray of Creation** was created – it contains the intention of Creation and everything is in total alignment with Creator’s intention. The first Ray of Creation is, “THE WILL OF CREATOR” - the Divine original perfection of Source. This Ray is used to initiate creations that are only created in Creator’s Light. It also had a component called “free will”.

Do you remember this time?

(Play my eagle drum)

.....You are enjoying your creations, and following the original blueprint of creation, but at STOP as you crereated, you started with your own designs, you created your own light creations and they were wild and beautiful, but of your light, and you fell further and further away from Creator’s light

Do you remember? Darkness got stronger and more denseness occured.

The **Second Ray of Creation** was formed to bring about a correction and to assist these creator gods to return to the use of the blueprint - the Second Ray holds all colour. With this Ray, you step up or down a situation.

And then the **Third Ray of Creation** was given - this holds the frequencies and sub-frequencies known as energetics. “Electricity, magnetism, adhesion and the power held within the atom massive building blocks of constructive energy that hold all possibilities.

Drum beat

The **Fourth, Fifth and Sixth Rays** were created together. They provided some stability.

The **Seventh Ray** - was another powerful ray.

The Eighth Ray of Creation holds many complex frequencies such as sound, light and geometries. This is a Ray for clearing – a very powerful Ray.

The Ninth Ray of Creation: holds sound templates, also known as sound currents or sound waves.

The **Tenth Ray of Creation** also has many complexities such as sound, light, color and geometries.

The **Eleventh and Twelfth Rays** are not available for use on the plane at this time

the Rays were created to try to stop the mutations and distortions

At the fall of Consciousness continued, the Rays of Creation were not successful in permanently stopping the distortions and mutations that continued to expand and grow. Distortations and mutations have no consciousness. They continue to grow. "They are like a virus or a machine that continues to duplicate and replicate! (like the vaccine!)"

The Christed light eventually fell from the planet and was lost. In darkness. This was the point of separation, of unconsciousness.

Fear, anxiety, separation - ripples and wobbles formed - anger, resentment, greed, jealousy, deceit, domination, control, incest, rape, etc.

Many of the Great Being of Light, the Avatars, Elohim, Angels, Archangels and many, many others were also consumed and caught within the Fall.

Earth fell - (eagle drum)

- Many attempts to step out of separation of 3rd dimension was made, Atlantis being one such attempt.

- In 2003, a new Ray of Creation was co-created by Creator with many Great Beings of Light led by Archangel Michael. This Ray contained the Element of Love -**it held the love that humanity holds for humanity**. This simple, pure, unique vibration of love was put in this new Ray and Activated. A reversal started.

- In 2013, there was a Shift. In 2014, the humanity returned Love to the Elementals They are now beginning to raise the new Earth.

- In 2012 (12-12-12) “The vibrational configuration of Metatron’s Cube, which had held Earth in the restricted configuration of the third dimension, was reconfigured into a fifth-dimensional geometric alignment. The third dimension was eliminated.” ***

- In 2018, in Atlanta, there was another gathering regarding the elementals - there was another shift which was felt by many.

MARVEL OF THE COSMOS

Richard Feather Anderson defined Sacred Geometry as nature's language for creating relationships, as a geometrical relationships and universal ratios that had to be created first, before our material universe could be created. He stated that Sacred Geometry:

- Guides Energy into Matter
- Gives a Sense of Identity to Form
- Guides the Growth of Organisms
- Creates Harmony and Coherence
- Gives a Way to Proportion Buildings in Harmony with Humans and the Cosmos

Wow! Think of Sacred Geometry, and how the Creator created this sacred geometry
- look at the sacredness of it all and of the 12 Rays of Creation .

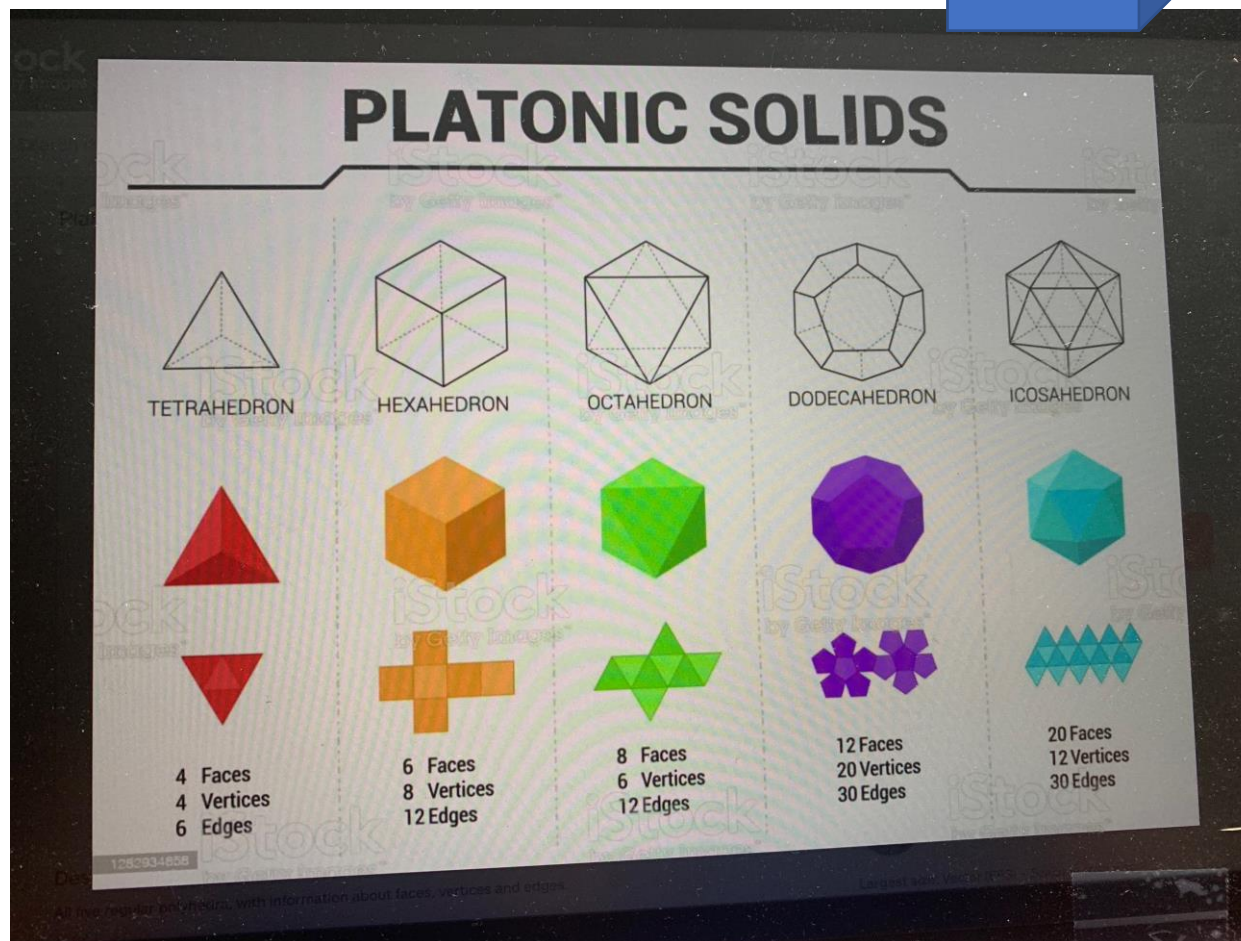

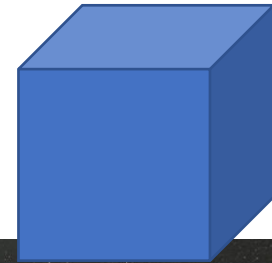

What a marvel this Cosmos is!

PLATONIC SOLIDS

Earth is one of the 12 Christed planets that fell.

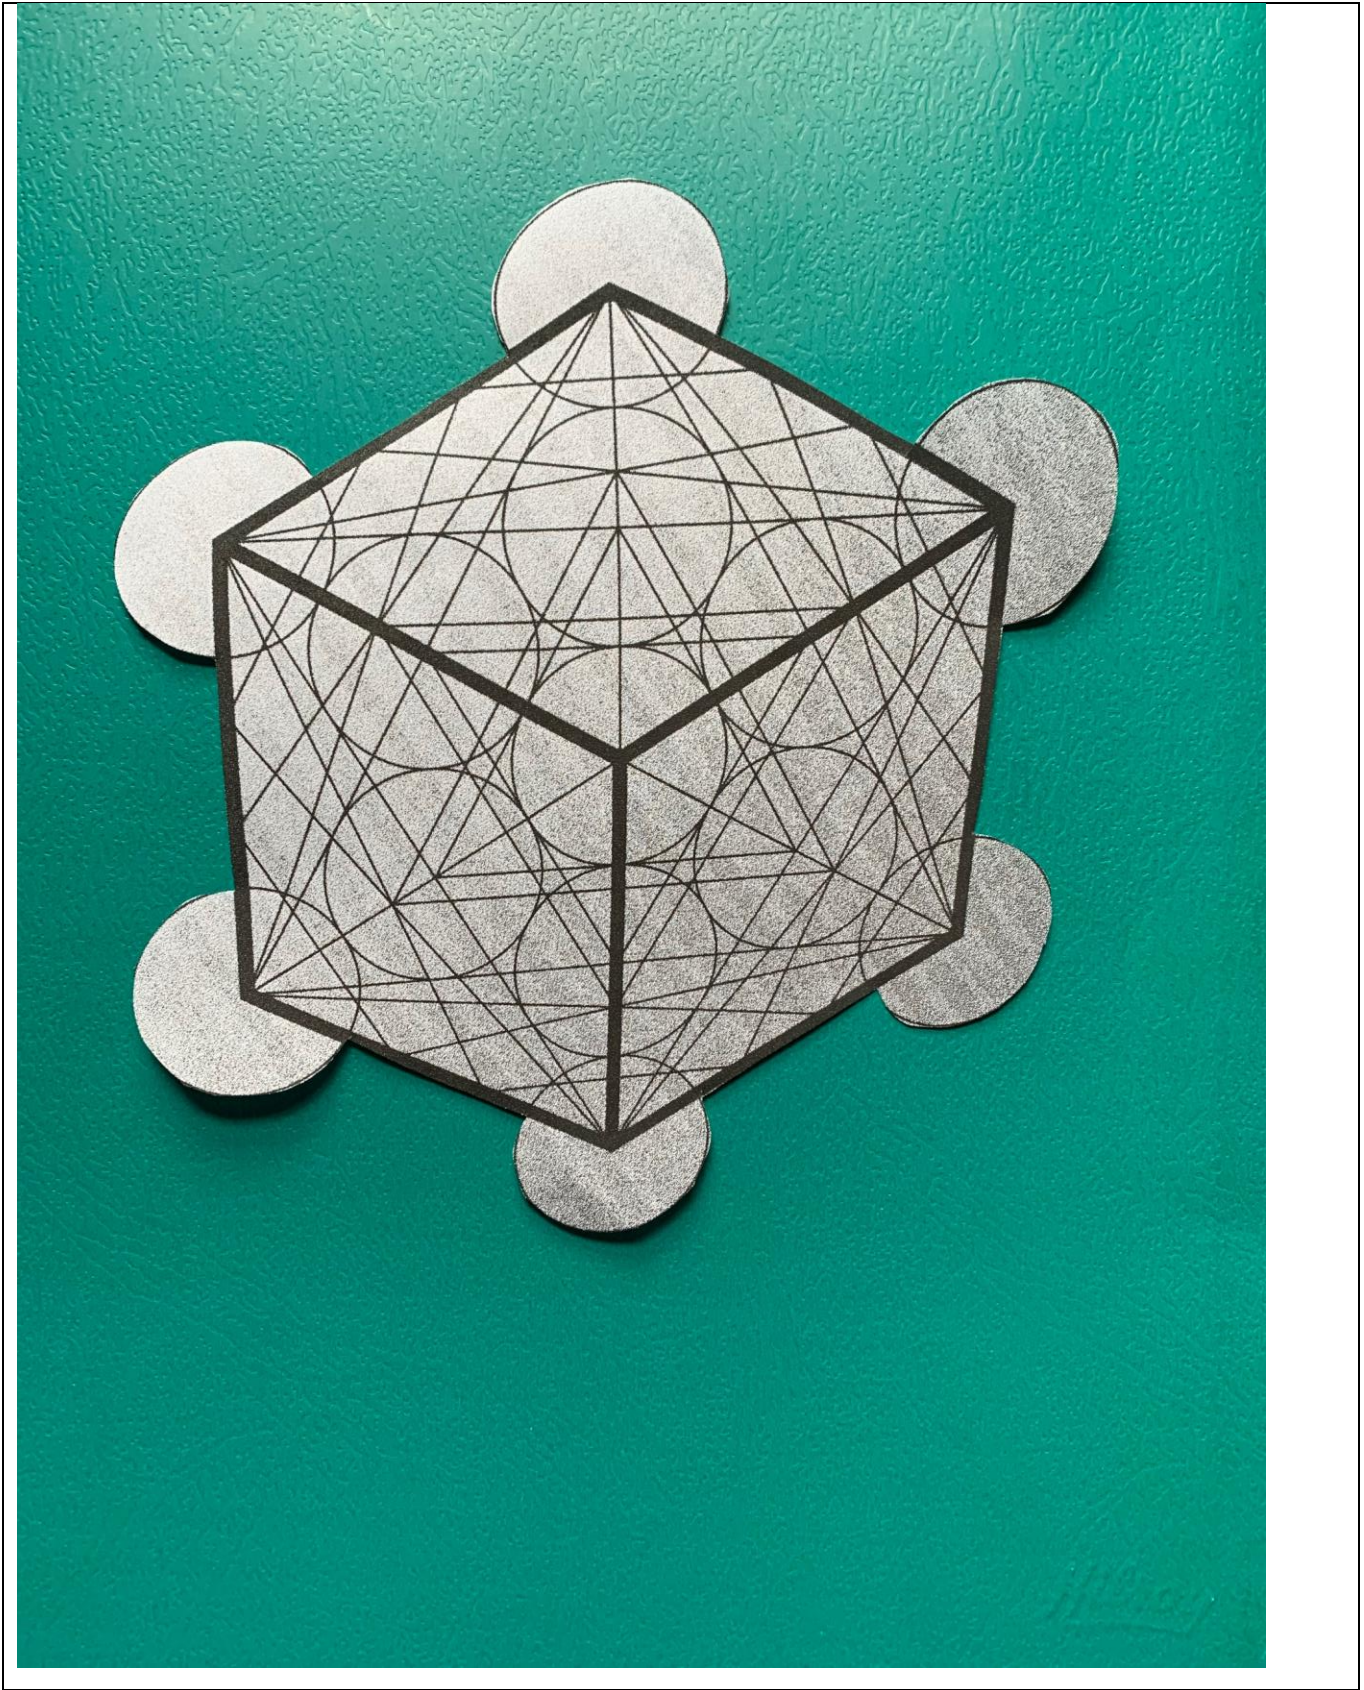

When we look at Metratron's Cube, you will notice the 5 Platonic solids in it. They are known as the building blocks of matter. They are the:

- ❖ tetrahedron
- hexahedron
- ❖ octahedron
- ❖ dodecahedron
- ❖ icosahedron

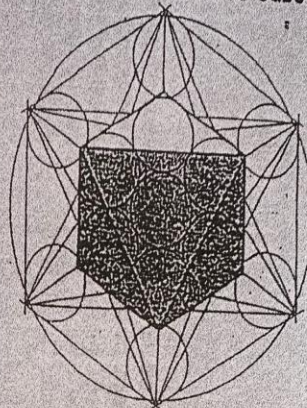

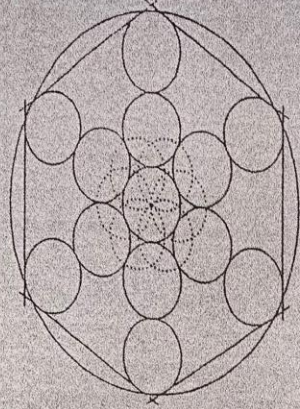

These five Platonic solids cover the geometric principles and the nature of the world around us.

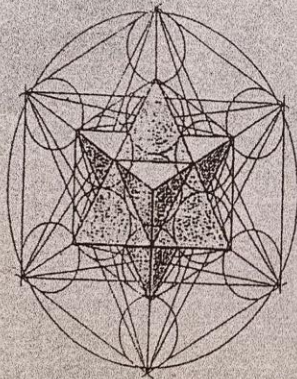

Metratron's cube shows how beautifully scientifically synchronized the world is and what it all means to be here one with the universe.

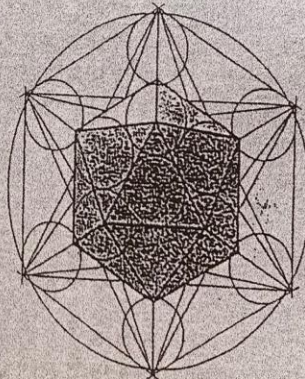

Generation of Platonic Solids From Seed of Life and Metatron's Cube

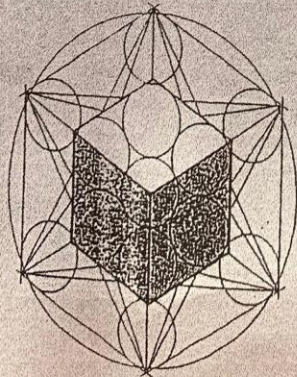

OCTAHEDRON - AIR

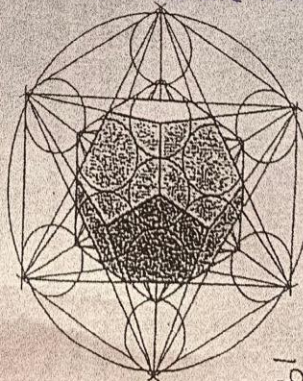

STAR TETRAHEDRON - FIRE

ICOSAHEDRON - WATER
BIOLOGICAL LIFE FORCE

CUBE - EARTH

DODECAHEDRON - ETHER
UNIVERSAL LIFE FORCE

Now once again, close your eyes

(Drum)

And feel the crystallized aspect of Light that sits in your Sacred Heart, the geometric star tetrahedron. Feel the love within the pink diamond, feel the love and go into the 5th dimension.

(Drum)

The 12 Rays of Creation are being returned to the Earth. You must be in the matching vibrational state to access the Rays..

As this planet raises it's consciousness, other planets and beings will follow.

Listen to the Language of Light * (my chanting)**

The Drum beats
